

Guide 2: VRChat Presenters (VRCP)

Welcome, OCETA Connect VRChat Presenter!

We're excited to have you share your insights in our immersive "OCETA Arena." Here's what you need to know:

- **Read "Guide 1: Instructions for ALL Participants" First!** (Especially sections on Patience, Streaming Delay, Speak Signals, Backup Plan, Power Management).

IMPORTANT: Do not use in presentation anything risky and unlicensed to prevent YouTube stream ban (visuals nor audio).

Presentation Modes:

- **Presenting in MS Teams:**
 - This is regular MS Teams presentation using MS Team Share feature:
<https://www.youtube.com/watch?v=ou6NCOZkvmY>
- **Presenting in VRChat:**
 - You will be presenting from within the VRChat "OCETA Arena."
 - Your slides will be displayed on a large screen in the Arena.
 - Your voice will be heard by both VRChat attendees and those watching on the MS Teams stream.
 - **If you will use VR Virtual Desktop:** If your VR Headset is connected to your PC computer, you can open the Virtual Desktop and share your presentation yourself in OCETA MS Teams meeting through MS Teams Share feature and use your VR Virtual Desktop to control your slides. The presentation will be streamed into VRChat from the MS Teams window.
 - **If you do not use VR Virtual Desktop:** You can send us your presentation and the OCETA operator will control your slides for you.
 - If you will connect to VR Chat on your PC desktop (without VR) you can control your slides through typical PC MS Teams Sharing.
- **Presentation Submission:**
 - Please send your presentation file (PDF preferred; Google Slides/Docs or MS Word also acceptable) or a link to your online presentation to the OCETA Lead (czart@amu.edu.pl) by **at least one day before the event**. This allows our Slides Manager (SM) to prepare for smooth slide advancement during your talk.

Presenting in VRChat Arena

- **VRchat Indirect Slide Control Panel:**
 - Within the presenter area in VRChat, you will see virtual "buttons."

- **Use these buttons to signal to the Slides Operator (SO) to manage slides:**
 - Next Slide
 - Previous Slide
 - Jump +5 Slides
 - Jump -5 Slides
 - First Slide
 - Last Slide
- When you press a button, it will light up, indicating your request is active.
- The light will go off once the SO has performed the action, confirming it's done. Please wait for this confirmation before you will click another slide's control button. Remember that the slide change will appear on the streaming screen with the 10-15 seconds delay.
- **Audio & Speaking:**
 - Ensure your VRChat microphone is working clearly. Test it before the event.
 - Speak clearly and at a moderate pace, mindful of the streaming delay.
 - Pay attention to the "Speak Signals" displayed above the streaming screen, especially during Q&A.
- **Technical Setup:**
 - Join the "OCETA Arena" in VRChat at least **15-20 minutes before the event starts** for a final tech check and orientation.
 - Ensure your PC/VR equipment is fully set and charged.
- **Q&A:**
 - Questions from the audience on MS Teams Chat will be visible on the main screen.
- **If Technical Issues Occur:**
 - Stay calm. The OCETA Lead will assist. If you lose connection, try to rejoin. If major issues prevent you from presenting in VRChat, we may ask you to switch to presenting via MS Teams (so as a backup plan, please have your slides prepared for MS Teams presentation in case of problems in VRChat) if feasible, or reschedule your slot if time permits.

We appreciate your contribution to the OCETA Experience!

Guide 3: VRChat Audience (VRCA)

Welcome to the OCETA Arena in VRChat!

- **Read "Guide 1: Instructions for ALL Participants" First!** (Especially sections on Patience, Streaming Delay, Speak Signals, Backup Plan, Power Management).
- **Choosing Your Avatar - IMPORTANT for Quest Users:**
 - To ensure good performance for everyone, especially attendees on Meta Quest headsets, please choose a **lightweight, "Good" or "Medium" performance-ranked avatar**.
 - Avoid "Very Poor" ranked avatars if possible. You can check avatar performance stats in VRChat.

- **Watching Presentations:**

- Presentations will be shown on the main screen in the "OCETA Arena."

Enjoy the cutting-edge experience!
